D. BACKGROUND INFORMATION

1. Do you believe this invention was developed while working under or in the performance of experimental, developmental or research work called for by a Government Contract or upon the understanding that a Government Contract would be awarded? NO YES

2. Has your invention been disclosed to anyone outside of Sony in a speech, exhibit, presentation, product, product manual, report, lecture, trade show, technical article, publication or otherwise? NO YES

3. Is this invention related to any previous Sony Invention Disclosures of which you are aware (made by you or someone else)? NO YES

SONY CONFIDENTIAL AND PROPRIETARY

REV. 8/25/93

Page 2 of 9

4. If you responded "YES" to any of questions 1-3, please explain below. Use a separate sheet if necessary.

5. Name of product(s) or project(s) for which this invention was developed:

Primary target: Digital Satellite System TV, or Digital Television
 Related product proposal: MIDAS/Media Rave AV Control software.

6. When do you expect a product incorporating this invention to be sold, offered for sale or shown to someone outside of Sony? (If a product or prototype has already been sold, offered for sale or shown, please identify the earliest date this happened.)
 1999 J/Sky 6 set top box, or Cable set top box for U.S. market.
 MIDAS AV Control software, summer 1998 target

7. Has a working model of the invention been built and tested (or appropriate software been written)?
 (V)NO ()YES If yes, who has witnessed a demonstration, and when?

8. List below any patents, publications, articles, texts, products, etc. which describe technology similar to your invention including reference material which may be useful in understanding the background technology of your invention: (Use a separate sheet if necessary and attach a copy of each item. Please include copies of all bibliographical information.)

- WebTV has or is planning similar reminder functions
- The Starsight and Gemstar patents also note ~~user~~ may also include functions that are similar to this function.

(Use a separate sheet if necessary)

III. DESCRIPTION OF THE INVENTION

1. Please provide a very brief (i.e. one short sentence) summary of your invention.

A messaging display that ~~user~~ is overlaid on top of a video signal to the remind users & ~~user~~ previously design to view a previously designated program.

2. Briefly describe the field of technology to which your invention relates:

Display of TV programs and related info on TV and computer screens for terrestrial, cable, satellite or other distribution of video programming.

3. Briefly describe the problems, issues or needs which led to the invention:

Many broadcasters advertise up-coming programs on their station. Although a user may become interested in this program, it is common to not remember the program at the time of airing. For this reason, a method is needed to select designate that you are interested in the program at the time it is advertised, and be reminded it is when it is about to air. Additional features can then extend this function.

4. How have others addressed these problems, issues or needs?

TV Guide online (on the Web) may have a bookmarking, or email remind function. WebTV may be planning such a function. I am unaware however of any effort that works with program advertisements given by the broadcasters. The only other way is to designate a future program to be recorded on to a VCR but this is a more explicit act, not a service.

Page 3 of 9

5. Describe those particular features or functions of your invention which you think may be novel or technical advancements over the technology you listed in section 1.8.:

- retrieval of channel, date, time, and program info from broadcast signal during an advertisement
- storing reminder date in a virtual calendar that can
- giving the user access to view, edit the calendar
- or enabling a friend or family member to recommend a program to a particular user
- enabling

6. Best Mode: Describe any and all preferences you personally have regarding how to best implement, build, produce, or use your invention (e.g. preferred parts, materials, techniques, etc. which you feel are best in practicing your invention). Each submitter's opinion is important here, even if there is disagreement. Please list anything you think will make the invention better in any way:

Hardware: a TV set top box, personal computer, Television or PC monitor (analog or digital) and an input device, either a remote control unit or mouse and keyboard.

Software / hardware: A CPU and application software capable of real time dynamic updating of a video screen including overlaying on top of video and anti-aliasing blending.

7. Briefly describe any alternate uses, variations or modifications of your invention which you contemplate:

As a basic messaging function, expected variations would include, news alerts, email display, paging services, and household alerts such as messages that appear when the phone rings, the door bell rings, etc.

8. Please provide any additional information you think should be known by the attorney reviewing this form:

see attached screen shots and diagrams.

9. Please provide a detailed description of your invention (Use one or more of the attached Invention Disclosure Data Sheets). Your description should ideally provide as many details of your invention as possible in order to achieve optimal patent protection. An ideal disclosure should describe the construction and operation of the invention including drawings (flow charts, schematics, block diagrams, mechanical drawings, photographs, etc.) and any relevant engineering laboratory notebook pages, reports, program listings, etc. If you have already prepared reports or other descriptive information, there is no need to rewrite it. Simply attach it and reference it in your invention disclosure data sheet (for example, "see attached 9 page engineering progress report addressed to John Doe dated 1 Jan., 1992 for description of amplifier circuit").
